

Weekly Aquarium Maintenance Checklist

From the experts at Double Vision Aquatics

Regular maintenance keeps your aquarium healthy, your fish thriving, and your water crystal clear. This quick checklist is designed to help you stay on track with weekly upkeep. Whether you're a seasoned aquarist or just starting out, consistent care makes all the difference.

Your Weekly Checklist

- ☐ **Check Water Temperature**
Make sure it's stable and within the ideal range for your fish.
- ☐ **Inspect Fish Behavior & Appearance**
Look for signs of stress, disease, or unusual behavior.
- ☐ **Top Off Evaporated Water**
Use dechlorinated water to maintain water levels.
- ☐ **Test Water Parameters**
Check pH, ammonia, nitrite, and nitrate levels using a test kit.
- ☐ **Clean Glass**
Wipe the inside of the tank to remove algae buildup.
- ☐ **Partial Water Change (10-20%)**
Use a gravel vacuum to clean debris and replace a portion of the water.
- ☐ **Check Equipment**
Inspect filters, heaters, lights, and air pumps to ensure they're working properly.
- ☐ **Feed Appropriately**
Feed your fish the right amount and remove any uneaten food.

Need help with maintenance?
